Subject : BIOLOGY  
DPP No. : 1

## Topic :- The Living World

- In five kingdom classification the unicellular prokaryotic organisms were classified under kingdom  
a) Protista                      b) Monera                      c) Animalia                      d) Plantae
- In angiosperms floral features are commonly used for identification, why?  
a) Flower can be preserved easily  
b) Flower are attractive to work with  
c) Flower have aroma and different colour  
d) Reproductive parts are more conservative
- True regeneration is found in  
a) *Amoeba*                      b) *Hydra*                      c) *Planaria*                      d) Bacteria
- The basic unit of classification is  
a) Species                      b) Genus                      c) Family                      d) Phylum
- Where is Biosphere Reserve Simlipal located?  
a) Kerala                      b) Odisha                      c) Asom                      d) Sikkim
- Where labelling is done/pasted on herbarium sheet?  
a) Lower RHS                      b) Lower LHS                      c) Upper RHS                      d) Upper LHS
- Who is regarded as Father of Taxonomy?  
a) Hooker                      b) Linnaeus                      c) Aristotle                      d) De Candolle
- Bionomial nomenclature was first issued in  
a) *Systema Naturae*                      b) *Genera Plantarum*                      c) *Genera Animalium*                      d) *Species Plantarum*
- National wildlife protection act came into force in/was inacted in  
a) 1978                      b) 1982                      c) 1972                      d) 1986

10. A taxon is a  
a) Group of related species  
b) Group of related families  
c) Type of living organism  
d) Taxonomic group of any ranking
11. A 'texa' differ from 'taxon' due to  
a) Being a higher taxonomic category than taxon  
b) Being a lower taxonomic category than taxon  
c) Being a plural of taxon  
d) Being singular of taxon
12. Correct name is  
a) *brassica indica*  
b) *Magnifera Indica*  
c) SOLANUM MELONGINA  
d) *Mimosa Pudica*
13. Increase in body mass can be considered a criterion for growth  
a) In living being  
b) Non-living being  
c) Both (a) and (b)  
d) None of these
14. Who is regarded as Father of Taxonomy?  
a) Hooker  
b) Linnaeus  
c) Aristotle  
d) De Candolle
15. Which one of the following taxonomic categories top the hierarchy of categories?  
a) Order  
b) Division  
c) Class  
d) Family
16. In five kingdom classification, the eukaryotes were assigned under how many kingdoms?  
a) Only four kingdom  
b) All five kingdom  
c) Only two kingdom  
d) Only three kingdom
17. Which taxonomical aid provide all information about a particular taxon like order or family  
a) Herbarium  
b) Catalogue  
c) Taxonomic key  
d) Monograph
18. Binomial system of nomenclature was given by  
a) Engler  
b) Linaeus  
c) Prantl  
d) Both (a) and (C)
19. In which of the following, metabolic reactions take place?  
a) In living organism only  
b) Both in living and non-living organism  
c) In isolated cell free systems  
d) Both (a) and (c)

20. What is the old name of Indian Board of wildlife
- a) National Board of Wildlife Animal
  - b) Central Board of Wildlife
  - c) Board of Wildlife
  - d) Wildlife Protection Board
