

Class: XIth

Date:

Subject: BIOLOGY

DPP No.: 5

Topic :- The Living World

	opie v ane za	8			
Which is not a category?			12.01		
a) Asteraceae/Fabaceae	b) Species	c) Phylum	d) Class		
Viral genome when incorporated and integrated with bacterial genome is referred as					
a) Prophages	b) DNA	c) RNA	d) Both (a) and (c)		
a) Flower can be preserveb) Flower are attractive toc) Flower have aroma and	ed easily work with different colour	ed for identification, why?			
A place where dried, press					
a) Herbarium	b) Museum	c) Botanical garden	d) Both (a) and (c)		
 Which one is the important function of botanical garden? a) Allow ex situ conservation of germplasm b) Are place for recreation c) Plant diversity can be observed d) Provide natural habitat for wildlife 					
Select true statement from the following and choose the right answer from the option given below I. Human's scientific name is Homo sapiens II. Genera Plantarum is written by John Ray III. Highest taxonomic categories is division IV. Taxonomic group of any rank is taxon V. A group of closely related species of organism represent genus VI. The term 'systematic' was coined by de Candolle a) II, III, IV and VI b) I, III, V and VI c) I. IV and VI					
	ngdom system of classi b) Simpson	•	d) Bentham and Hooker		
	Which is not a category? a) Asteraceae/Fabaceae Viral genome when incorp a) Prophages In angiosperms floral feat a) Flower can be preserve b) Flower are attractive to c) Flower have aroma and d) Reproductive parts are A place where dried, press a) Herbarium Which one is the important a) Allow ex situ conservat b) Are place for recreation c) Plant diversity can be of d) Provide natural habitat Select true statement from I. Human's scientific name II. Genera Plantarum is wri III. Highest taxonomic cate IV. Taxonomic group of an V. A group of closely relate VI. The term 'systematic' v a) II, III, IV and VI c) I, IV and V Who has proposed five kin	Which is not a category? a) Asteraceae/Fabaceae b) Species Viral genome when incorporated and integrated a) Prophages b) DNA In angiosperms floral features are commonly use a) Flower can be preserved easily b) Flower are attractive to work with c) Flower have aroma and different colour d) Reproductive parts are more conservative A place where dried, pressed and preserved plana) Herbarium b) Museum Which one is the important function of botanical a) Allow ex situ conservation of germplasm b) Are place for recreation c) Plant diversity can be observed d) Provide natural habitat for wildlife Select true statement from the following and choose in the companies of the companies is division in the companies is division in the companies of categories of organism via the companies of categories is division in the companies of categories is division in the companies of categories is division in the companies of categories in the companies of categories is division in the companies of categories in the categories is division in the companies of categories in the categories of categories is division in the categories of categories	a) Asteraceae/Fabaceae b) Species c) Phylum Viral genome when incorporated and integrated with bacterial genome is refer a) Prophages b) DNA c) RNA In angiosperms floral features are commonly used for identification, why? a) Flower can be preserved easily b) Flower are attractive to work with c) Flower have aroma and different colour d) Reproductive parts are more conservative A place where dried, pressed and preserved plant specimens are kept a) Herbarium b) Museum c) Botanical garden Which one is the important function of botanical garden? a) Allow ex situ conservation of germplasm b) Are place for recreation c) Plant diversity can be observed d) Provide natural habitat for wildlife Select true statement from the following and choose the right answer from the I. Human's scientific name is Homo sapiens II. Genera Plantarum is written by John Ray III. Highest taxonomic categories is division IV. Taxonomic group of any rank is taxon V. A group of closely related species of organism represent genus VI. The term 'systematic' was coined by de Candolle a) II, III, IV and VI b) I, III, V and VI c) I, IV and V Who has proposed five kingdom system of classification?		

8.	Which is the only kingdom occupied by BGA, nitrogen fixing bacteria and methanogenic bacteria in five kingdom classification?				
	a) Plantae	b) Protista	c) Monera	d) Fungi	
9.	Increase in body mass can be considered a criterion for growth				
	a) In living being	b) Non-living being	c) Both (a) and (b)	d) None of these	
10.	Animal of the same phylum are grouped below. Chooa) Shark, snake, whale, reptilesc) Snail, squid, slug		ose the incorrect group from given below option b) Insect, spider, shrimp d) Earthworm, millipede, leech		
11.	a) Increase in size	d features, which is not a	nique feature of living organisms? b) Response to stimuli		
	c) Self organisation		d) Growth and reproduction		
12.	The concept of genus was a) John Ray	proposed by b) Tourne Fort	c) Hooker	d) Bessey	
13.	Which one is the correct h a) Genus <species<class< c)="" species<order<class<<="" td=""><td>C<mark>order</mark></td><td colspan="3">nomy? b) Genus<class<order>family d) Genus<class<division<order< td=""></class<division<order<></class<order></td></species<class<>	C <mark>order</mark>	nomy? b) Genus <class<order>family d) Genus<class<division<order< td=""></class<division<order<></class<order>		
14.	What size of herbarium sha) 30×40 cm, 6×12 cm	neet and label is recomme	ended generally?		
	b) 29 × 41 cm, 7 × 14 cm c) 30 × 45 cm, 7 × 12 cm				
	d) 20 × 30 cm, 5 × 10 cm				
15.	Which one of the following a) Family	g taxonomic categories ca b) Genus	an categorized rest all other c) Class	s d) Order	
16.	The number of species classified in "Species Plantarum" is				
	a) 5000	b) 6000	c) 4000	d) 3800	
17.	Which of the following set of organisms reproduce by fragmentation (asexual mode of reproduction)? a) <i>Amoeba</i> , fungi and earthworm b) Fungi, filamentous algae and protonema of				
	mosses c) <i>Hydra</i> , fungi, <i>Amoeba</i> and bacteria d) Earthworm, bacteria and fungi				

- 18. Which one of the following is the feature of phylum-Chordata is also exhibited by adult tunicate?
 - a) Possession of visceral slits
 - b) Possession of a ventral chord
 - c) Possession of closed vascular system
 - d) Possession of ventral tubular nervous system
- 19. Who has proposed five kingdom system of classification?
 - a) RH Whittaker
- b) Simpson
- c) Haldane
- d) Bentham and Hooker
- 20. The first phylogenetic system of plant classification was proposed by
 - a) Engler
- b) Engler and Prantl
- c) Eicher
- d) Bentham and Hooker
