Topic :- Human Health & disease

	· · · · · · · · · · · · · · · · · · ·					
1.	Colostrum					
	a) Can be synthesized by the new born baby					
	b) Is a natural source of antibodies that secreted from the breast for the first few days after birth					
	c) Contain primarily fat					
	d) Is a enzyme involved in stimulating lactation					
2.	Large group of lymphoid tissue in respiratory, digestive and urogenital tract are collectively called					
	a) MALT	b) Peyer's patches	c) Mucosa lymph nodes	d) α -globulins		
3.	Select the true statement					
	I. AIDS has no cure, preven <mark>tion i</mark> s the b <mark>est op</mark> tion					
	II. During HIV infection, th <mark>e pers</mark> on suf <mark>fers f</mark> rom fever, weight loss and diarrhoea					
	III. HIV is a retrovirus, whi <mark>ch means its gen</mark> etic material is DNA					
	a) I and II	b) I and III	c) II and III	d) None of these		
4.	Diacetyl morphine is comm <mark>only</mark> known as					
	a) Morphine	b) <i>Cannabis</i>	c) heroin	d) Cocaine		
5.	Reasons for alcohol abuse in adolescents are					
J.	I. social pressure					
	II. curiosity and need for adventure, excitement and experiment					
	III. to escape from stress, depression and frustration					
	IV. to overcome hardships of daily life					
	Which of the statements given above are correct?					
	a) I, II and III	b) I, III and IV	c) II, III and IV	d) I, II, III and IV		
	, ,	, ,	, ,	, , ,		
6.	A disease which can easily transmit from one person to another is called					
	a) Non-infectious disease		b) Infectious disease			
	c) Viral disease		d) Bacterial disease			
7	The name of Mary Mallon is related with the disease					
7.	a) Typhoid	b) Pneumonia	c) Dengue	d) AIDS		
	aj rypnoiu	o) riieuiiioiiia	c) Deligue	uj AlDS		

8.	The organ related with im a) Liver	nmunity is b) Parathyroid	c) Thymus	d) Pineal		
9.	Tiny lesions of multiple so a) Magnetic resonance im c) X-rays radiography	-	al tissue can be observed by b) Position emission tomography d) Digital subtraction angiography			
10.	Genetic material found in a) Double stranded RNA c) Double stranded DNA	Human Immunodeficienc	cy Virus(HIV)is b) Single stranded RNA d) Single stranded DNA			
11.	A major benefit of breast feeding for the new born i a) Low lactose content c) Passive immunity		infant is b) The high casein content d) <i>E. coli</i> factor			
12.	The uncontrolled prolifer a) Tumour	ation of cancerous cells pr b) Multiplication	oduces masses of cells, call c) Protooncomass	ed d) None of the above		
13.	Characters of acquired im a) Specificity c) Retains memory	amunity are	b) Difference between se d) All of the above	lf and non- self		
14.	A damaging immune resp a) Immunity	o <mark>nse by the bod</mark> y to a subs b) Allergy	stance is called c) Passive immunity	d) None of these		
15.	T-lymphocyte is produced a) Bone marrow	d <mark>in</mark> b) Spleen	c) Pancreas	d) Thymus		
16.	Ginseng is an important da) America	rug of b) Egypt	c) India	d) Chain		
17.	An antibody is a a) White corpuscle, which attacks invading bacteria b) Molecule that specifically inactivate an antigen c) Component of the blood d) Secretion of mammalian erythrocyte					
18.	Blood circulation was disca) William Harvey	covered by b) Hippocrates	c) Karl Landsteiner	d) Paul Ehrlich		
19.		rough	b) Blood d) All of the above			

- 20. Consider the following statements
 - I. People should get vaccination to avoid infection
 - II. Vaccination is available against polio, cholera, typhoid, tuberculosis and many other disease
 - III. Eradication of vectors are necessary in diseases like malaria and filariasis
 - IV. Dengue and chikengunya, both are spread by *Culex* mosquitoes

Which of the statements given above are correct?

- a) I, II and III
- b) I, II and IV
- c) I, III and IV
- d) III and IV
